Objective

Highly skilled and motivated web developer experienced in designing and developing responsive websites. Seeking a challenging position as a web developer to utilize my technical expertise and creativity in delivering innovative and high-quality web solutions

Projects

1. Yummy-Eats

- Developed a responsive e-commerce website using React, integrated with a back-end API.
- Implemented a user registration and authentication system using Express.js and MongoDB.
- Designed and optimized the website for mobile devices using CSS media queries.
- Provided details about various recipes, including information about food items, chefs, and their recipes.
- Links: GitHub-Client | GitHub-Server | Live-Site

2. Toy-Car-World

- Developed a responsive e-commerce website using React, integrated with a back-end API.
- Implemented a user registration and authentication system using Express.js and MongoDB.
- Implemented a search functionality allowing users to find specific toy cars based on various criteria.
- Implemented functionality to update toy data, allowing users to modify information such as specifications, pricing, and availability.
- Links: GitHub-Client | GitHub-Server | Live-Site

3. Craftopia-Art-School

- Developed a web application for an art school.
- Students can choose classes, view their selected classes, make payments, and manage their enrolment.
- Instructors can add classes, track their classes, and receive feedback from the admin.
- Admins can manage class approvals, user roles, and provide feedback to instructors.
